# Cracker

**Wilthagen started as a traditional village butchery. Our family business is now several generations ahead. Thanks to inventive techniques and a new look at our production methods, we developed delicious new vegetable and fish snacks. Which can be made from residual products. We don't like to waste what still has great taste.**

**Crunchy and light:** We have been innovating with our production of crackers for four years now, 2022 will be our fifth year. We started with shrimp crackers or krupuk, because this snack is internationally known and valued. We have developed surprising new vegetarian and vegan lines and are still expanding them. Because we are amazed by the many flavours and shapes these crackers can take. Versatile, with a long shelf life. The crispy, puffy texture goes well with a range of possibilities.

**Sea & Land by Wilthagen:** We love to introduce four new snacks under the name Sea & Land by Wilthagen. Offering you the best of the sea and the land. The name is a nod to our home province of Zeeland. These are the snacks that we prefer to eat ourselves, brought together under our own premium label. Preserved in beautiful new packaging.

- Made from tapioca flour, so gluten-free.
- Shrimp are considered an allergen, so we process these separately.
- A simple but smart process: we steam, dry, cut and bake.
- Natural ingredients only.
- Delicious as a snack, straight out of the bag.
- Great to cook with, to fill up or dunk in a dip.

Do you love crackers and krupuk as much as we do?  
We'd love to hear from you!
