# Dutch Krupuk

**Maybe the most popular Asian snack: krupuk, kerupuk or kroepoek. Tasty fried crackers made from tapioca starch. Flavoured using local ingredients. By using seasonal and regional produce, we offer super-fresh products, harvested by people we know personally.**

The most famous krupuk variety is shrimp or prawn cracker. Our Wilthagen shrimp krupuk is made from North Sea shrimp: 17% shrimp – shrimp meat, shrimp shells – for extra flavour and less waste.

Our seaweed krupuk contains 31% rockweed or wrack, cut by hand from the Oosterscheld, the largest National Park in the Netherlands. This cold-water seaweed keeps its nice salty taste after heating.

Our Wilthagen onion krupuk is packed with 87% sweet onions. Vegetable crisps really, but light and airy in true krupuk style. The onions are already sweet and aromatic by themselves, so we add hardly any salt or sugar. Nature's flavours, without e-numbers.

- Made from tapioca flour, so gluten-free.
- Shrimp, considered an allergen, processed separately.
- A simple but smart process for steaming, drying, cutting and baking.
- Natural ingredients only.
- Delicious as snack food, straight out of the bag.
- Great to cook with, to fill up or dunk in a dip.
